Subject Index of Volume 74

Acid catalysis
homogeneous and heterogeneous; on real nature of aliphatic carbenium ions as active intermediates of, 257
Acoustic wave
SH surface, to analysis of catalysis on immobilized galactose oxidase; application of, 459
Addition
oxidative; mechanistic aspects in, and reductive elimination involving allylic complexes of Pd and Pt: specific role of olefin ligand in catalytic allylic coupling, 481
Alcohols
C_1–C_5; SiO_2-supported bimetallic Ru cluster-derived catalysts for selectivity and activity control in CO hydrogenation toward, 379
Alkanes
application to stoichiometric activation of C–H bonds of, and to low-temperature catalytic hydrogenolysis of; surface organometallic chemistry of Zr, 353
Alkenes, Olefins
interaction of ethylene with H-covered Pd(110) surface, 163
mechanistic aspects in oxidative addition and reductive elimination involving allylic complexes of Pd and Pt: specific role of olefin ligand in catalytic allylic coupling, 481
organometallic Ni catalysts bound to polymeric matrices in oligomerization and/or polymerization of, with replica of support morphology, 421
partial oxidation of, by molecular oxygen catalysed by (alumina)$Rh(O_2)$, 443
1-; structural analogies between homogeneous and heterogeneous catalysts for stereospecific polymerization of, 433
supported Pt/Sn complexes as catalysts in hydroformylation of olefins, 401
Aluminium
chemoselectivity and regioselectivity in hydrogenation of α,β-unsaturated carbonyl compounds promoted by Cu/Al_2O_3, 267
partial oxidation of olefins by molecular oxygen catalysed by (alumina)-$Rh(O_2)$, 443
stereospecific polymerization by aluminoxane/metallocene, 109
Aromatic compounds
catalysis of zeolite molecular sieves containing Fe for ethylbenzene dehydrogenation, 223
coordination of benzene in clusters: face-capping mode, 61

Biologically active compounds
new prospects for using Co catalysts as; some aspects of relation between homogeneous and enzymatic catalysis, 153

Carbamates
catalytic incorporation of CO_2 into organic substrates: synthesis of unsaturated carbamates, carbonates and ureas, 97
Carbenium ions
aliphatic; on real nature of, as active intermediates of homogeneous and heterogeneous acid catalysis, 257
Carbonates
catalytic incorporation of CO_2 into organic substrates: synthesis of unsaturated carbamates, carbonates an ureas, 97
Carbonyl
complexes in pillared clays, 285
Cr(II) and Cr(III) ions grafted at internal nests of pentasilic zeolite (silicalite): characterization and formation of polycarbonylic, polynitrosylic, and mixed species by interaction with CO and NO, 175
hydrosilylation and hydrogenation activity of homogeneous and immobilized dicarbonyl (2,4-pentanedionato)-rhodium complexes, 335

metal, clusters; CO hydrogenation on Mo-promoted Rh/SiO_2 and Rh/ZrO_2 derived from, 365
Sn–Co, complexes; electrochemical synthesis and catalytic applications of, 465
supported Pt/Sn complexes as catalysts in hydroformylation of, 401
α,β-unsaturated, compounds; chemoselectivity and regioselectivity in hydrogenation of, promoted by Cu/Al_2O_3, 267
Carbonylation
reductive, of silica-supported $MCl_3 \cdot 3H_2O$ (M = Rh, Ir); surface organometallic chemistry, 391
C–C bond formation
mechanism of, by transition metals, 185
CC and CO transformations
in ketenylidene cluster compounds, 73
C–C double bond
Pd(II)-catalysed oxygenation of, by molecular oxygen: probe for involvement of Pd hydroperoxide species, 489
C–H bonds
application to stoichiometric activation of, of alkanes and to low-temperature catalytic hydrogenolysis of alkanes; surface organometallic chemistry of Zr, 353
Chromium
Cr(II) and Cr(III) ions grafted at internal nests of pentasilic zoelite (silicalite): characterization and formation of polycarbonylic, polynitrosylic, and mixed species by interaction with CO and NO, 175
in situ FT–IR study of Cu–Cr oxide catalysts in CO oxidation, 193
Clays
anionic; synthesis and properties of, pillared by $[XM_{12}O_{40}]^{n-}$ Keggin ions, 23
pillared; carbonyl complexes in, 285
Clusters
CC and CO transformations in ketenylidene cluster compounds, 73
coordination of benzene in: face-capping mode, 61
highly dispersed metal clusters and colloids for preparation of active liquid-phase hydrogenation catalysts, 323
metal carbonyl; CO hydrogenation on Mo-promoted Rh/SiO_2 and Rh/ZrO_2 derived from, 365
metal: model for molecular surface switch in genesis of highly dispersed metal particles, 317
SiO_2-supported bimetallic Ru cluster-derived catalysts for selectivity and activity control in CO hydrogenation toward C_1–C_5 alcohols, 379
CO
CC and CO transformations in ketenylidene cluster compounds, 73
Cr(II) and Cr(III) ions grafted at internal nests of pentasilic zeolite (silicalite): characterization and formation of polycarbonylic, polynitrosylic, and mixed species by interaction with CO and NO, 175
hydrogenation on Mo-promoted Rh/SiO_2 and Rh/ZrO_2 derived from metal carbonyl clusters, 365
hydrogenation; SiO_2-supported bimetallic Ru cluster-derived catalysts for selectivity and activity control in, toward C_1–C_5 alcohols, 379
oxidation; *in situ* FT–IR study of Cu–Cr oxide catalysts in, 193
oxidation; velocity distribution of desorbing product of, on Pd(110), 169
CO_2
catalytic incorporation of, into organic substrates: synthesis of unsaturated carbamates, carbonates and ureas, 97
photocatalytic reduction of, on anchored titanium oxide catalysts, 207
Coadsorption
molecular events in, of molecules at metal surfaces, 11
Cobalt
aspects, some, of relation between homogeneous and enzymatic catalysis: new prospects for using Co catalysts as biologically active compounds, 153
electrochemical synthesis and catalytic applications of Sn–Co carbonyl complexes, 465
and Rh: models and tendencies with; mono- or polynuclear surface species, 51
Colloids
highly dispersed metal clusters and colloids for preparation of active

liquid-phase hydrogenation catalysts, 323
preparation and characterization of polymer-protected Pd–Au colloidal bimetallic catalysts, 275
Copper
chemoselectivity and regioselectivity in hydrogenation of α,β-unsaturated carbonyl compounds promoted by Cu/Al_2O_3, 267
in situ FT–IR study of Cu–Cr oxide catalysts in CO oxidation, 193
Cyanide
zeolite-included phthalocyanines: synthesis, characterization and catalysis in ox-red reactions, 293

Dehydrogenation
ethylbenzene; catalysis of zeolite molecular sieves containing Fe for, 223
Desorbing product
velocity distribution of, of CO oxidation on Pd(110), 169

Electrochemical synthesis
and catalytic applications of Sn–Co carbonyl complexes, 465
Enzymatic catalysis
and homogeneous catalysis: some aspects of relation between; new prospects for using Co catalysts as biologically active compounds, 153

Face-capping mode
coordination of benzene in clusters, 61

Galactose oxidase
immobilized; application of an SH surface acoustic wave to analysis of catalysis on, 459
Gold
preparation and characterization of polymer-protected Pd–Au colloidal bimetallic catalysts, 275

Heteropoly compounds
insoluble, as highly active catalysts for liquid-phase reactions, 247
Hydrocarbons
oxidation of, with dioxygen, 131
hydroformylation
supported Pt/Sn complexes as catalysts in, of olefins, 401

Hydrogenation
active liquid-phase, catalysts; highly dispersed metal clusters and colloids for preparation of, 323
chemoselectivity and regioselectivity in, of α,β-unsaturated carbonyl compounds promoted by Cu/Al_2O_3, 267
CO, on Mo-promoted Rh/SiO_2 and Rh/ZrO_2 derived from metal carbonyl clusters, 365
CO; SiO_2-supported bimetallic Ru cluster-derived catalysts for selectivity and activity control in, toward C_1–C_5 alcohols, 379
and hydrosilylation activity of homogeneous and immobilized dicarbonyl-(12,4-pentanedionato)rhodium complexes, 335
impact of surface organometallic chemistry in heterogeneous catalysis: new class of highly chemoselective hydrogenation catalysts, $Rh_5Sn(n\text{-}C_4H_9)_2/SiO_2$, 43
structure, new, and hydrogenation activity of $Fe_3(CO)_{12}$ supported on SiR_x (R: CH_3, C_6H_5)-modified SiO_2 surfaces, 345
Hydrogenolysis
low-temperature catalytic: application to stoichiometric activation of C–H bonds of alkanes and to, of alkanes; surface organometallic chemistry of Zr, 353
Hydrosilylation
and hydrogenation activity of homogeneous and immobilized dicarbonyl-(2,4-pentanedionato)rhodium complexes, 335

Immobilization
application of SH surface acoustic wave to analysis of catalysis on immobilized galactose oxidase, 459
hydrogenation and hydrosilylation activity of homogeneous and immobilized dicarbonyl(2,4-pentanedionato)rhodium complexes, 335
Inorganic solid acids and bases
liquid-phase organic reactions catalysed by, 35
Iridium
surface organometallic chemistry: reductive carbonylation of silica-supported $MCl_3 \cdot 3H_2O$ (M = Rh, Ir), 391

Iron
catalysis of zeolite molecular sieves containing, for ethylbenzene dehydrogenation, 223
new structure and hydrogenation activity fo $Fe_3(CO)_{12}$ supported on SiR_x (R: CH_3, C_6H_5)-modified SiO_2 surfaces, 345
two-electron-transfer oxidation by polymer-supported $[Fe_4S_4(SR)_4]^{2-}$ complex, 451

Keggin ions
$[XM_{12}O_{40}]^{n-}$; synthesis and properties of anionic clays pillared by, 23
Ketenylidene cluster compounds
CC and CO transformations in, 73

Liquid-phase organic reactions
catalysed by inorganic solid acids and bases, 35

Macromolecular catalysts
new strategies in using, in organic synthesis, 409
Mercury
photosensitized reactions; recent advances in, 85
Metallocene
/aluminoxane; stereospecific polymerization by, 109
Metalloporphyrin catalysts
selective synthesis with, 121
Metalloproteins
synthetic approach to dioxygen binding sites in, 143
Metal surfaces
molecular events in coadsorption of molecules at, 11
restructuring and self-organization in reactions on, 1
Molybdenum
CO hydrogenation on Mo-promoted Rh/SiO_2 and Rh/ZrO_2 derived from metal carbonyl clusters, 365

Nickel
organometallic, catalysts bound to polymeric matrices in oligomerization and/or polymerization of olefins with a replica of support morphology, 421
NO
Cr(II) and R(III) irons grafted at internal nests of pentasilic zeolite (silicalite): characterization and formation of polycarbonylic, polynitrosylic, and mixed species by interaction with CO and NO, 175

Olefins: see Alkenes
Oligomerization
organometallic Ni catalysts bound to polymeric matrices in, and/or polymerization of olefins with a replica of support morphology, 421
Organic synthesis
new strategies in using macromolecular catalysts in, 409
Organometallic chemistry
surface:
impact of, in heterogenous catalysis: new class of highly chemoselective hydrogenation catalysts, $Rh_5Sn(n\text{-}C_4H)_2/SiO_2$, 43
reductive carbonylation of Si-supported $MCl_3 \cdot 3H_2O$ (M = Rh, Ir), 391
of Zr: application to stoichiometric activation of C–H bonds of alkanes and to low-temperature catalytic hydrogenolysis of alkanes, 353
Oxidation
CO; *in situ* FT–IR study of Cu–Cr oxide catalysts in, 193
CO; velocity distribution of desorbing product of, on Pd(110), 169 of hydrocarbons with dioxygen, 131
partial, of olefins by molecular oxygen catalysed by (alumina)$Rh(O_2)$, 443
two-electron-transfer, by polymer-supported $[Fe_4S_4(SR)_4]^{2-}$ complex, 451
Oxygen
oxidation of hydrocarbons with dioxygen, 131
partial oxidation of olefins by molecular oxygen catalysed by (alumina)-$Rh(O_2)$, 443
Pd(II)-catalysed oxygenation of C–C double bond by molecular oxygen: probe for involvement of Pd hydroperoxide species, 489
synthetic approach to dioxygen binding sites in metalloproteins, 143
Oxygenation
Pd(II)-catalysed, of C–C double bond by molecular oxygen: probe for involvement of Pd hydroperoxide species, 489

Palladium
interaction of ethylene with H-covered Pd(110) surface, 163
mechanistic aspects in oxidative addition and reductive elimination involving allylic complexes of Pd and Pt: specific role of olefin ligand in catalytic allylic coupling, 481
Pd(II)-catalysed oxygenation of C–C double bond by molecular oxygen: probe for involvement of Pd hydroperoxide species, 489
preparation and characterization of polymer-protected Pd–Au colloidal bimetallic catalysts, 275
velocity distribution of desorbing product of CO oxidation on Pd(110), 169
Phosphates
catalyst design of two-dimensional zirconium phosphates, 213
Photosensitized reactions
Hg; recent advances in, 85
Phthalocyanines
zeolite-included: synthesis, characterization and catalysis in ox-red reactions, 293
Platinum
mechanistic aspects in oxidative addition and reductive elimination involving allylic complexes of Pd and Pt: specific role of olefin ligand in catalytic allylic coupling, 481
supported Pt/Sn complexes as catalysts in hydroformylation of olefins, 401
Polymer
preparation and characterization of polymer-protected Pd–Au colloidal bimetallic catalysts, 275
two-electron-transfer oxidation by polymer-supported $[Fe_4S_4(SR)_4]^{2-}$ complex, 451
Polymeric matrices
organometallic Ni catalysts bound to, in oligomerization and/or polymerization of olefins with a replica of support morphology, 421
Polymerization
organometallic Ni catalysts bound to polymeric matrices in oligomerization and/or, of olefins with a replica of support morphology, 421
stereospecific, by metallocene/aluminoxane, 109
stereospecific structural analogies between homogeneous and heterogeneous catalysts for, of 1-alkenes, 433
Porphyrin
selective synthesis with metalloporphyrin catalysts, 121
Proteins
metallo-; synthetic approach to dioxygen binding sites in, 143

Reduction
photocatalytic, of CO_2 on anchored titanium oxide catalysts, 207
Restructuring
and self-organization in reactions on metal surfaces, 1
Rhodium
CO hydrogenation on Mo-promoted Rh/SiO_2 and Rh/ZrO_2 derived from metal carbonyl clusters, 365
and Co: models and tendencies with; mono- or polynuclear surface species, 51
hydrogenation and hydrosilylation activity of homogeneous and immobilized dicarbonyl(2,4-pentanedionato)rhodium complexes, 335
impact of surface organometallic chemistry in heterogeneous catalysis: new class of highly chemoselective hydrogenation catalysts, $Rh_8Sn(n\text{-}C_4H)_2$, 43
partial oxidation of olefins by molecular oxygen catalysed by (alumina)-$Rh(O_2)$, 443
surface organometallic chemistry: reductive carbonylation of Si-supported $MCl_3 \cdot 3H_2O$ (M = Rh, Ir), 391
Ruthenium
SiO_2-supported bimetallic Ru cluster-derived catalysts for selectivity and activity control in CO hydrogenation toward C_1–C_5 alcohols, 379

Silicon
CO hydrogenation on Mo-promoted Rh/SiO_2 and Rh/ZrO_2 derived from metal carbonyl clusters, 365
Cr(II) and Cr(III) ions grafted at internal nests of pentasilic zeolite (silicalite): characterization and formation of polycarbonylic, polynitrosylic, and mixed species by interaction with CO and NO, 175

impact of surface organometallic chemistry in heterogeneous catalysis: new class of highly chemoselective hydrogenation catalysts, $Rh_8Sn(n\text{-}C_4H_9)_2/SiO_2$, 43
SiO_2-supported bimetallic Ru cluster-derived catalysts for selectivity and activity control in CO hydrogenation toward C_1–C_5 alcohols, 379
structure, new, and hydrogenation activity of $Fe_3(CO)_{12}$ supported on SiR_x (R: CH_3, C_6H_5)-modified SiO_2 surfaces, 345
surface organometallic chemistry: reductive carbonylation of silica-supported $MCl_3 \cdot 3H_2O$ (M = Rh, Ir), 391
Ti sites in titanium silicalites: XPS, XANES and EXAFS study, 233
Spectroscopy
in situ FT–IR study of Cu–Cr oxide catalysts in CO oxidation, 193
Ti sites in titanium silicalites: XPS, XANES and EXAFS study, 233
Structural analogies
between homogeneous and heterogeneous catalysts for stereospecific polymerization of 1-alkenes, 433
Surface acoustic wave
SH; application of, to analysis of catalysis on immobilized galactose oxidase, 459
Surfaces
impact of surface organometallic chemistry in heterogeneous catalysis: new class of highly chemoselective hydrogenation catalysts, $Rh_8Sn(n\text{-}C_4H_9)_2/SiO_2$, 43
influence of support on thermal stability of surface-bound $[WCp(CO)_3]^-$: implications for catalyst design, 305
interaction of ethylene with H-covered Pd(110) surface, 163
metal clusters: model for molecular surface switch in genesis of highly dispersed metal particles, 317
metal; molecular events in coadsorption of molecules at, 11
metal; restructuring and self-organization in reactions on, 1
mono- or polynuclear surface species: models and tendencies with Co and Rh, 51
structure, new, and hydrogenation activity of $Fe_3(CO)_{12}$ supported on SiR_x (R:CH_3, C_6H_5)-modified SiO_2 surfaces, 345
surface organometallic chemistry: reductive carbonylation of silica-supported $MCl_3 \cdot 3H_2O$ (M = Rh, Ir), 391
surface organometallic chemistry of Zr: application to stoichiometric activation of C–H bonds of alkanes and to low-temperature catalytic hydrogenolysis of alkanes, 353
velocity distribution of desorbing product of CO oxidation on Pd(110), 169

Thermal stability
influence of support on, of surface-bound $[WCp(CO)_3]^-$: implications for catalyst design, 305
Tin
electrochemical synthesis and catalytic applications of Sn–Co carbonyl complexes, 465
impact of surface organometallic chemistry in heterogeneous catalysis: new class of highly chemoselective hydrogenation catalysts, $Rh_8Sn(n\text{-}C_4H_9)_2/SiO_2$, 43
supported Pt/Sn complexes as catalysts in hydroformylation of olefins, 401
Titanium
photocatalytic reduction of CO_2 on anchored titanium oxide catalysts, 207
Ti sites in titanium silicalites: XPS, XANES and EXAFS study, 233
Transition metals
mechanism of C–C formation by, 185
Tungsten
influence of support on thermal stability of surface-bound $[WCp(CO)_3]^-$: implications for catalyst design, 305

Ureas
catalytic incorporation of CO_2 into organic substrates: synthesis of unsaturated carbamates, carbonates and ureas, 97

Velocity distribution
of desorbing product of CO oxidation on Pd(110), 169

Zeolite
catalysis of zeolite molecular sieves containing Fe for ethylbenzene dehydrogenation, 223

Cr(II) and Cr(III) ions grafted at internal nests of pentasilic zeolite (silicalite): characterization and formation of polycarbonylic, polynitrosylic, and mixed species by interaction with CO and NO, 175
-included phthalocyanines: synthesis, characterization and catalysis in ox-red reactions, 293

Zirconium
catalyst design of two-dimensional zirconium phosphates, 213
CO hydrogenation on Mo-promoted Rh/SiO_2 and Rh/ZrO_2 derived from metal carbonyl clusters, 365
surface organometallic chemistry of: application to stoichiometric activation of C–H bonds of alkanes and to low-temperature catalytic hydrogenolysis of alkanes, 353
